

Student job (HiWi m/w/d)

Creative Support for Research Communication

*Think you can do
even better?*

In order to make science accessible to a wider audience, research requires visualization of complex data, processes and methods. We are looking for a person that will help putting our cutting-edge research results into clear and comprehensive graphics – creativity is very much welcome. The support will cover homepage articles, presentations, technical reports, and other scientific outreach following our corporate identity. Most of our research focuses on artificial intelligence and complex dynamics.

Your tasks:

- Polish graphical output of Matlab and Python programs
- Generate moving pictures and GIFs
- Create flowcharts and schematics
- Maintain and further develop our corporate identity

Your profile and skills:

- Enthusiasm for creating high-quality graphics
- Skills in PowerPoint, Inkscape, Tikz or related software
- Basic experience with Matlab/Python is a plus
- Structured way of thinking, working, and communicating
- Commitment for at least 6 months, Bachelor students are welcome!

Sounds like a job for you?
